commercialize Education. The Policy envisages that in the interest of maintaining standards and for several other valid reasons, the commercialization of technical and professional education will be curbed. An alternative system will be devised to involve private and voluntary efforts in Education, in conformity with accepted norms and goals.

Government had recently convened a Round Table on Higher Education on 21st October 2009 to advise on important areas of growth in the education sector including the finances to meet the demands of expansion and quality of higher education. During discussion, it was felt that in the matter of skill development and vocational education, a different model needs to be evolved which grants a greater role to the private sector and where the structural requirements of setting up institutions are far more flexible than that for other higher educational institutions. It was decided that alternative models that provide structural flexibility and financial freedom need to be evolved. The Round Table has decided to entrust the responsibility of development of a concept paper to one of its members, Shri Analjit Singh, Chairman of M/s. Max India Ltd.
